

Parking lot USB exercise

Contents	<p>Write 2-3 sentences about the types of information found on this device.</p> <p><i>The USB device contained sensitive personal information belonging to Jorge that wasn't meant for public viewing. Additionally, it held work files containing PII of other individuals and information about hospital operations.</i></p>
Attacker mindset	<p>Write 2-3 sentences about how this information could be used against Jorge or the hospital.</p> <p><i>An attacker could utilize the timesheet information to gather intelligence about Jorge's coworkers. Both personal and professional information could be weaponized for social engineering attacks. For instance, malicious actors could craft convincing emails appearing to come from Jorge's colleagues or family members.</i></p>
Risk analysis	<p>Write 3 or 4 sentences describing technical, operational, or managerial controls that could mitigate these types of attacks:</p> <p><i>Several control measures could help prevent such attacks. Employee awareness training about USB-related threats and proper incident response procedures serves as an effective managerial control. Regular antivirus scanning provides operational protection. Additionally, implementing technical controls like disabling AutoPlay on company computers prevents automatic execution of malicious code from USB devices.</i></p>
